# UNPARALLELED PRODUCT DEVELOPMENT AND ENGINEERING: CAPABILITY, SPEED, AGILITY AND TECHNOLOGY

- SIG's R&D investment outstrips competitors with 100+ engineers and a dedicated facility, **special weapons group focused on innovative military small arms**
- **Developed organically and launched 6 new platforms since 2012:**
  - P320 Pistol 9mm Platform
  - P365 Micro-Pistol 9mm Platform
  - SIG MCX™ Carbine/Rifle multi-caliber Platform
  - SIG MPX™ Sub Machine Gun 9mm Platform
  - SIG MCX™ Carbine/Rifle 5.56mm Platform
  - SIG516G2 Carbine/Rifle 5.56mm Platform
  - SIG716G2 Rifle 7.62mm Platform
- ***New multi-caliber (7.62x51mm and 6.8mm) Light Machine Gun in development***
- Active development and support partnerships with US Special Forces, international elite agencies, and military/security forces around the globe

# FOCUS ON DEFENSE SYSTEMS FOR GLOBAL ELITE AGENCIES TO BECOME A COMPLETE SYSTEMS PROVIDER

Distinct from other competitors, **SIG** focuses development on elite Defense Agencies' requirements, usually "Systems"

Product lines comprising the "System" are:

- 1) Firearm
- 2) Ammunition
- 3) Suppressors
- 4) Electro-Optics
- 5) Parts & Accessories

All new product line capabilities are developed organically

## MAJOR DEFENSE WINS

In **2009**, vision formed to transform SIG from a pistol provider to U.S. Commercial and U.S. Law Enforcement market to become a **Global Defense** provider with the matching product portfolio to do so

### 2009-2016:

- Developed human infrastructure and developed revolutionary P320, MCX and MPX
- MCX win with U.S. Army Special Forces
- Global Defense wins in Saudi Arabia, Mexico, UAE, Turkey, Netherlands, Indonesia, Peru, Oman, UK, France

In **2017-2018**, transformation reached a tipping point:

- **Major wins with P320 pistol** including U.S. Army (M17/M18), U.S. Department of Homeland Security, Thai Police, Danish Army, and U.S. Law Enforcement State Agencies, **creating a U.S. Commercial market share surge**
- Continuing spread of MCX and MPX product lines into U.S. and Global special forces creating interest and opportunities in larger rank-and-file military forces
- Major **optics wins** including U.S. Army, SOCCOM, FBI, and Internationally Netherlands, Indonesia, Thailand
- **New non-firearms product lines reaching 20% of company revenue** including deliveries of ammunition and electro-optics to U.S. Special Forces, Department of Homeland Security and FBI; **Defense sales reaching 25% of company revenue**
- Upgrading company infrastructure and amassing an industry-leading concentration of talent

# SIG P320

## Introduction

Launched in 2014; to date, SIG SAUER has shipped over one million units to military, law enforcement, and commercial customers worldwide.

Proven service pistol designed from the ground up with the input of military personnel and law enforcement officers, resulting in the most accurate, reliable, durable, ergonomic, and safe striker fired duty pistol on the market.

Available in an array of different sizes, calibers, colors, and configurations; from sub-compact, to carry, to full-size, there is a P320 that will meet the ergonomic and mission needs of any operational scenario.

# SIG P320 KEY FEATURES

## Proven Design

- Over one million P320s currently in active use worldwide including over 100,000 M17 and M18 variants delivered to the U.S. Army.

## Accuracy

- Natural grip angle facilitates intuitive aiming and sight acquisition.

## Reliability

- Passes rigorous U.S. Army, Department of Homeland Security and other military and federal law enforcement agency.

## Environmental Durability

- Passes all NATO environmental testing.

## Modular & Ergonomic

- Common serialized housing with interchangeable grip modules.
- Easily converted from full size to compact and can accommodate small, medium, or large grip sizes for user adaptability.
- Optics ready platform.

## Safety

- Unparalleled safety through robust mechanical safety systems.
- Does not require trigger pull to take down pistol.

P320 XCOMPACT

P320 XCARRY COYOTE TAN

# SIG P320 KEY FEATURES

## Modularity

- Modular polymer grip frame and removable fire control unit
- User configurable slide, barrel, and grip conversions
- Swap between different calibers and barrel lengths quickly at the operator level without tools
- Compatible with end user preferred accessories
  - Sights
  - Lights/Lasers
  - Grips
  - Miniature Red Dot Sights
- Variety of magazine capacities available
  - 15 round (Compact)
  - 17 round (Carry and Full Sized)
  - 21 round extended (Carry and Full Sized)

Removable Serialized Stainless Steel Fire Control Unit

P320 X-Full Size in Coyote with SIG Romeo1Pro Mini Red Dot

# SIG P320 KEY FEATURES

## Safety

Taking into account the concerns of military and police officers, the P320 provides an enhanced level of safety not found on most modern service pistols. Unlike its competitors, the P320 does not require the operator to pull the trigger nor use a special tool to take-down the firearm for field stripping, cleaning or routine maintenance.

## 3-Point Takedown Safety System

- Must remove magazine
- Must lock slide to rear
- Rotate takedown lever for disassembly without tools or trigger manipulation

1. Press in magazine catch and remove the magazine.

2. Manually retract the slide to the rear and engage the slide catch lever locking the slide to the rear.

Visually and physically inspect the chamber and magazine well to ensure the pistol is empty.

**CHECK A SECOND TIME!**

3. Rotate the takedown lever clockwise until it stops (should be pointed to the 7 o'clock position).

4. Maintain control of the slide while depressing the slide catch lever and remove the slide assembly from the frame by pulling it forward.

# AMMUNITION

SIG SAUER established an ammunition line in 2013 with the goal of creating ammunition engineered to perform optimally with SIG SAUER weapon systems and competitor offerings.

SIG SAUER invested \$33M to establish a world-class ammunition headquarters in Jacksonville, Arkansas

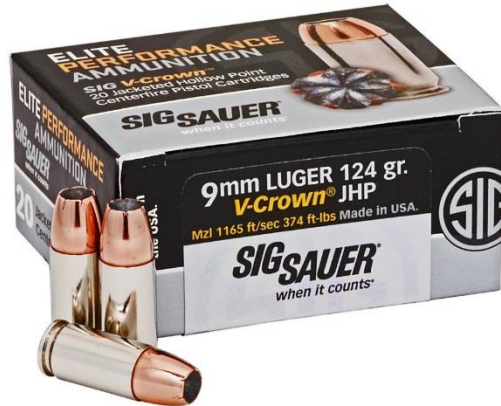

- 360 million rounds per year capacity
- 70,000 square foot facility
- Ballistics test lab and indoor range facility
- In-house production of all small arms calibers
- Development, prototype, mass production
- MIL-SPEC requirements met
- Precision manufacturing equipment

## SIG 9 MM AMMUNITION LINE

### SIG V-CROWN

- Defensive 9 mm round available in 3 different weights
  - 115, 124, 147 grain
- Stacked hollow point cavity
- Exceptional target energy
- Optimal expansion and stopping power

### SIG FMJ

- Training ammunition engineered to match SIG V-CROWN ballistics
- Affordable, premium level performance
- Durable copper-jacketed bullets
- Matches point-of-impact, recoil, and energy of SIG V-CROWN loads
  - Available in 115, 124, 147 grain
