

“Invitation for industry to showcase Automated Document Inspection Systems (DIS) for first-line use

In occasion of the formal launch of an operational Expert Group on Document Control, the Air Border Sector of the Joint Operation Unit with the support of the Research and Development Unit invites developers/vendors of automated document inspection systems (for first line use) to showcase their products (stationary, mobile or handheld) in the afternoon of 18 May 2017 at Frontex Headquarters, in Warsaw, Poland.

The objective of the event is to provide an informal platform to demonstrate current technology capabilities in the field of document inspection in the first line of border control.

Participants will be advanced level document officers and specialised document experts from border guard authorities and document expert units from EU Member States and Schengen Associated Countries as well as Frontex staff.

*To showcase, please register by **31.03.2017**, rdu-technology-assessment@frontex.europa.eu, with the subject **“Invitation for industry to showcase Automated Document Inspection Systems (DIS) for first-line use”**, providing information also about the equipment you will be showcasing.*

Attendance capacity is limited, invitations will be determined on a strict first come, first served basis so in order to avoid disappointment you should express your interest as soon as possible. 6 to 10 companies will be selected for the mentioned event. The companies’ representatives must cover by themselves the costs related to their participation.

More information about logistics will be sent to successfully registered participants. “
